DEFIANT

A VR GAME BY:

2025

GAME OVERVIEW

DEFIANT is a VR horror game where you collect items and escape a scary forest while being chased by a giant evil ant.

You wake up in a dark, creepy forest. Your goal is to find and collect important items, put them in the right places, and get out alive.

But you're not alone. Anthonevil, a huge and scary ant, is hunting you down.

Will you escape the forest alive or will the monster ant catch you?

This game uses VR for a more interactive and scary gameplay.

You can use the controllers to run across the map.

You can also carry items in your hands and store them in your inventory.

Sample photos from our thesis:

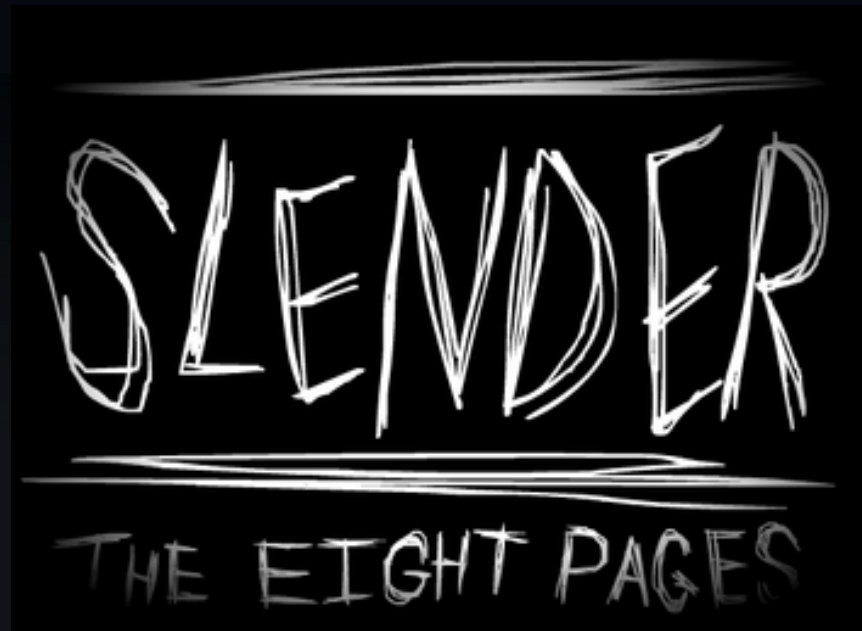

ART STYLE

- We decided on 3D designs for the environment for a more scarier feel.
- The collectibles are 2D so that the player will be able to differentiate the items easily.
- Visual Tone will be low-saturation colors, deep shadows to build suspense.

INSPIRATIONS AND REFERENCES

Slender : The Eight Pages

Minimalist horror game that's focused on collecting items while being hunted.

Phasmophobia

Has strong use of VR mechanics like picking up and storing items, and immersive sound.

Siren Head : Awakening

Focuses on atmosphere, suspense, and being hunted with limited gameplay mechanics
